Education:

Sep 2010 – Jun 2015	Taxes and Taxation Specialist **Bashkir State University** Ufa, Republic of Bashkortostan, Russian Federation

Certifications:

Jan 2024 – Feb 2024	Courses by **Meta** "HTML and CSS in depth", "Programming with JavaScript", "Version Control" "React Basics"," Advanced React"

Experience:

Oct 2022 – until now

Self-study
As part of self-study, I have created projects such as "Portfolio website", "Restaurant Website", "Quiz Creator", "Password Generator" and other.

The project "Portfolio website" is a website developed using **React.js** and the **React Router** library for routing. It consists of the Home page and the Projects page (with links to GitHub repositories.). The website also includes Header and Footer. The **Bootstrap** library is integrated for styling and creating a responsive design.

The "Quiz Creator" is a web app developed using **React.js**. It comprises the Home page, Navigation, Quiz Model and Quiz. The Quiz Model component allows users to create questions and answers, which are then added to a list and saved in **JSON** format. The Quiz Component provides functionality to load a file containing question and answer data. It presents users with a quiz interface, allowing them to answer questions and receive feedback.

The "Password Generator" is a web application built using **React.js**, **TypeScript** and the **Chakra UI** library for styling. It offers users a simple interface to generate passwords with customizable length and complexity settings. Users can choose between simple passwords consisting of lowercase letters only, or complex passwords containing uppercase letters, numbers, and symbols.

Skills: HTML, CSS, JavaScript, TypeScript, React, Git

Languages: **English:** Pre-Intermediate   **German:** A2   **Russian:** Native
